

# Horizon Business Insight 15.0

## Correction Notes

### HBI Administrator

#### Distribution Lists

CR	Release #	Resolution
271528	HBI 15.0	Previously, the Print option did not properly print distribution list content. This has been corrected.

### HBI Highlight Editor

#### Qualify

CR	Release #	Resolution
224740	HBI 15.0	The qualification description in the Highlight Editor Information window now indicates whether the qualification is defined on detail rows or subtotals.

### HBI Scorecard Editor

#### Scorecard Editor - Other

CR	Release #	Resolution
297702	HBI 15.0	An error no longer occurs when refreshing multiple scorecards at once in the Scorecard Editor.

### HBI - Viewer

CR	Release #	Resolution
329030	HBI 15.0	The About portlet types Help topic in the Dashboard now displays the correct images for the various portlet type icons.

# Horizon Business Insight 15.0

## Correction Notes

### Highlights - Viewing

CR	Release #	Resolution
272461	HBI 15.0	View-time qualifications using non-subtotalling fields for a cached dimension will now display the appropriate values in the highlight.
279025	HBI 15.0	In the Viewer, an error no longer occurs when attempting to modify the display settings of a highlight measure when Cache Dimensions is enabled.
296304	HBI 15.0	Previously, a double quote in highlight data caused errors when viewing the highlight. This has been corrected.
297280	HBI 15.0	Previously, an error occurred when viewing a highlight built from a Database subset if the total number of dimensions and measures in the highlight exceeded the total number of fields in the subset. This has been corrected.
318178	HBI 15.0	View-time qualifications no longer remove the default qualification when cached dimensions are used.
321560	HBI 15.0	Previously, an error occurred when viewing a highlight with a formula field based on a view-based subset field with decimal data type. This has been corrected.

### Print

CR	Release #	Resolution
315493	HBI 15.0	The following highlight fields were not included in the PDF printed output: Current Qualification, Table Filter, and Graph Filter. These three fields have now been added to the PDF print output when available from the source highlight.

### Scorecard - Viewing

CR	Release #	Resolution
325204	HBI 15.0	When viewing a highlight from a scorecard, the Return link no longer disappears when the user creates or deletes a bookmark or creates, modifies, or deletes a highlight description.
