Notes to the Study For
Georgia Discharge Database

January 1, 2012 – June 30, 2012 Inpatient/Outpatient/ ER Data

The discharge data received by GHA for January 1, 2012 – June 30, 2012 was processed through GHA's data partner, the Hospital Industry Data Institute (HIDI). Please note that the hospitals included in the study have submitted their data for this time period. In addition, it is only these hospitals that will receive access to the HeRMES family of products.

Patient Types Included in the GDDS

The Georgia Discharge Data System classifies data based on the patient type. The chart below details the patient types that are included in the database, along with their abbreviated codes.

Code	Description
I	Inpatient
SW	Swing Bed
E	Emergency Room
A	Ambulatory Surgery
AE	Emergency Ambulatory Surgery
O	Other / Outpatient

Patient type "AE" (Emergency Ambulatory Surgery) is limited to patients that were first treated in the emergency room, and then received a service in the ambulatory surgery setting during the same encounter; it is not a category that combines "E" (Emergency) or "A" (Ambulatory Surgery) records. Patient type "O" (Other/Outpatient) includes observation, mammography, MRI, diagnostic cardiac catheterization, and therapeutic cardiac catheterization records.

Modification of Revenue Table

The revenue table included in the GDDS is condensed, in order to save space. For inpatients, revenue data will be rolled up by revenue and HCPCS codes, and a revenue date will no longer be included for that particular record. Data users will still be able to determine a patient's service period by linking to the patient record table. For outpatients, data will be rolled up revenue and HCPCS codes, and revenue date.

Fatal Audits Table Warning

Please use caution when verifying and comparing records flagged as having a fatal error. It was brought to GHA's attention that not all records that should have been flagged as having an error were actually included in the Fatal Audits table (this issue more specifically applies to some records missing a principal diagnosis).

Restricted Patient Discharge Statuses

Hospitals are restricted from seeing other hospitals' patient discharge statuses when the patient has died. Discharge statuses of 20, 40, 41, and 42 are all changed to 01 (discharged to home). Hospitals are able to view their own statuses without any changes.

Restricted Diagnosis Codes

GHA currently restricts ICD-9 diagnosis codes that fall into the following classifications:
- Misadventures to patients during surgical & medical care.
- Surgical and medical procedures as the cause of abnormal reaction of patient or later complication, without mention of misadventure at the time of procedure.
- Drugs, medicinal, and biological substances causing adverse effects in therapeutic use.

In the diagnosis table, where these codes would appear (between ICD-9 codes between E870.00 and E879.99 and between E930.00 and E949.99), a 'Restric' is listed instead.

Restricted Demographic Data of Psychiatric Patients

To comply with federal and state laws governing psychiatric patient information, GHA now de-identifies certain fields for patients with a primary diagnosis of a psychiatric illness. A psychiatric patient is classified as such if the record has an ICD-9 code that falls into the range of 290.00 and 319.99. Hospitals will still be able to see their own patient demographic data, but for other hospitals, GHA is removing the patient data from the following fields:
- Patient Record table: CENSUS_TRACT, STATEMENT_COVERS_FROM_DT, DISCH_DATE (actual discharge date is changed to the last day of the month for all of these records), PT_CITY, PT_DOB, AGE_IN_DAYS, AGE_IN_MONTHS, AGE (only if patient is older than 89 years of age), ADMIT_DATE, OBS_STARTDATE
- Procedure table: PX_DATE
- Revenue table: REV_DATE

Discharges by Patient Type (1/1/12 - 6/30/12)

Reason Codes:

1 - At least one month has a "Patient type I" volume of 0
2 - At least one month has relatively high volume
3 - At least one month has relatively low volume
4 - Lowest month has a volume of less than 8 cases

Bold red font indicates hospitals that have at least one month with unexpected level of volume

Reason Codes:
1 - At least one month has a "Patient type 0" volume of 0
2 - At least one month has relatively low volume
3 - At least one month has relatively high volume
4 - Lowest month has a volume of less than 10 cases
5 - Total "Patient type 0" volume is less than 10% of inpatient volume

Bold red font indicates hospitals that have unexpected volumes. Reason Codes can be found at the end.

Reason Codes:

1 - Total Ambulatory Surgery volume is 0 when beds > 25
2 - At least one month has relatively high volume
3 - At least one month has relatively low volume
4 - At least one month has less than 10 cases while the avg is > 65 cases
5 - Hosp has at least 100 beds but a total volume < 100 cases

Bold red font indicates hospitals that have at least one month with unexpected level of volume
